

Footprints You Can See...

Measurements You Can Trust!

GAITRite Worldwide
Sales and Marketing
60 Garlor Drive
Havertown, PA 19083
mike@gaitrite.com

Our new wireless network that allows for the collection of up to six devices simultaneously with the GAITRite footfalls, facilitating precise synchronization without extensive setup or analysis headaches.

Our first wireless device is a dual-axis inclinometer and the next device is a tri-axial accelerometer/gyroscope. Each device will be housed in a 1.5" x 2" x 1" enclosure.

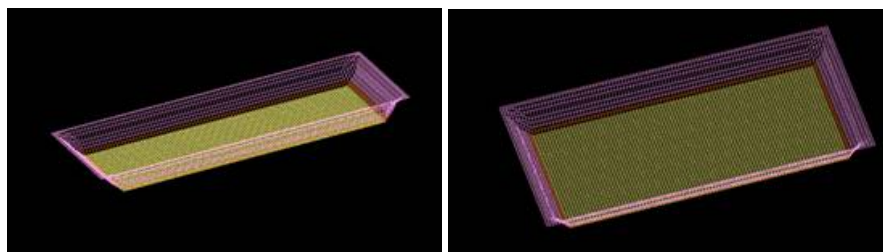

With these data, along with the GAITRite data, clinicians will have an efficient, easy to use, yet powerful tool to document functional outcomes.

Inclinometer data (shown in degrees, left/right, forward/backward)

The 3-D tray moves with the replay of the footfalls...
